Nothing in this Article shall be deemed to impair the right of the master of a ship to require a seafarer to perform any hours of work necessary for the immediate safety of the ship, persons on board or cargo, or for the purpose of giving assistance to other ships or persons in distress at sea. In such situation, the master may suspend the schedule of hours of work or hours of rest and require a seafarer to perform any hours of work necessary until the normal situation has been restored. As soon as practicable after the normal situation has been restored, the master shall ensure that any seafarers who have performed the work in a scheduled rest period are provided with an adequate period of rest. In addition, the International Convention on Standards of Training, Certification and Watch Keeping for Seafarers (STCW) requirements covering overriding operational conditions shall apply, including those of STCW A-VIII/1, Article 9.

A Seafarer, who is discharged owing to sickness or injury, shall be entitled to medical attention (including hospitalization) at the Company's expense for as long as such attention is required. The shipowner shall be liable to defray the expense of medical care and maintenance until such time as further medical treatment would not improve the Seafarers position.

SICK PAY

§ 15

1. When a Seafarer is signed off and landed at any port because of sickness or injury, their wages shall continue until they have been repatriated at the Company's expense as specified in Article 21. The provision of sick pay following repatriation shall be subject to submission of a valid medical certificate, without undue delay. However, in the case of injury the sick pay shall be paid until the injured Seafarer has been cured or until the incapacity has been declared to be of a permanent character. Proof of their continued entitlement to sick pay shall be by submission of satisfactory medical certificates. At the time they leave the Ship the Seafarer shall be paid an advance of their sick pay for the estimated number of days certified by a doctor for which they are expected to be sick or injured.

In the event of any such designations the provisions of Articles 18 (1.) and 18 (2.) shall apply. The full details of any Areas so designated shall be attached to the CBA and made available on board the vessel.

ANNEX 2

Article 1: ITF POLICY ON MANNING OF SHIPS

1. The basic principles involved in arriving at manning requirements should be considered prior to considering the numbers of each type of officer or rating that might be required. The following basic concepts have a bearing on manning:

Article 2: Recognition and Development Criteria

Essential To The Task of Defining Manning Requirements

1. Among the criteria which have traditionally been used for this purpose are the following:
 - a) trading area (e.g. home trade [A1], middle trade [A2], worldwide trade [A3 and A4])
 - b) number, size and type of main propulsion units (HP/KW, Diesel or steam) and auxiliaries
 - c) tonnage (GT)
 - d) safety of voyage between ports (e.g. duration of voyage, nature of voyage)
 - e) construction and technical equipment of ship
 - f) catering needs
 - g) sanitary regulations
 - h) watchkeeping arrangements
 - i) responsibilities in connection with cargo handling in port
 - j) medical care aboard ship

Article 3: Further Criteria

1. As a result of the social evolution and the changes that have taken place in the shipbuilding and shipping industries and in particular in view of the increasing importance of social aspects in shipboard employment there are further criteria governing the manning of ships. Consequently, the following factors should be added to those listed in Article 2 a) to j) above:

- a) Safe watchkeeping requirements and procedures
- b) Provisions regarding working hours
- c) The maintenance function as it relates to:
 - I) ship machinery and support equipment
 - II) radio communications and radio navigation equipment
 - III) other equipment (incl. cargo support and handling equipment) and
 - IV) navigation and safety equipment
- d) The human complement necessary to ensure that while malfunctioning automatic and remote control equipment is being repaired the function of the controlled equipment will still be available to the vessel, on a manual basis.
- e) Peak workload situations
- f) The human endurance/health factor (manning must never fall below the level at which the seafarers' right to good health and safety is jeopardized)
- g) Adequate manning to ensure that the ship's complement can cope with on-board emergencies
- h) Adequate manning to ensure that the ship can assist other ships in distress
- i) On-board training requirements and responsibilities
- j) Responsibilities flowing from the need for environmental protection
- k) Observance of industrial safety and seamen's welfare provisions
- l) Special conditions generated by the introduction of specialized ships
- m) conditions generated by the introduction of hazardous cargoes which may be explosive, flammable toxic, health-threatening or environment-polluting
- n) Other work related to safety aboard the ship

- o) Age and condition of ship

Article 4: Operational and Maintenance Activities

1. Shipboard activities that must be carried out so that the operation and maintenance of the ship and its equipment shall not pose hazards to lives of seafarers and passengers, to property or to the environment. These activities include the functions carried out by the following departments:

- a) Deck Department
- b) Engine Department
- c) Radio Department
- d) Catering Department

Article 5: Three-Watch System (based on an 8 hours working day)

1. This system shall be applied to the deck and engine departments in all seagoing ships. Neither the Master nor the Chief Engineer shall be required to stand watches, and shall not be required to perform non-supervisory work.
2. The number of qualified personnel on board ships shall be at least such as to ensure compliance with the 1995 International Convention on Standards of Training, Certification and Watchkeeping for Seafarers and the 1980 IMCO Assembly Resolution on Principles of Safe Manning.

Article 6: Safety and Hygiene

1. Furthermore it will be necessary to pay due attention to the contributions of the catering personnel towards the overall safety and hygiene of ships.

Article 7: Interlinkage of Shipboard Activities

1. The fact that all shipboard activities are interlinked must be the guiding principle governing the manning considerations set forth under "Further Criteria" above. For example, safe navigation cannot be undertaken if propulsion equipment, steering gear, radionavigation or radiocommunication equipment are malfunctioning. Similarly the health of those aboard will determine their availability to function in the optimum manner necessary for the safe operation of the ship. Sea going Ships shall carry a competent person in charge of medical care on board in line with Regulation VI/4 (Mandatory minimum requirements relating to medical first aid and medical care) of the 1995 STCW Convention and the applicable Sections of the STCW Code, Parts A and B .

Article 8: The Network Factor

1. The "network" factor i. e. the fact that all ships are interdependent upon one another for mutual assistance must be kept in mind in considering manning requirements. The planning must be adequate to ensure the capability of the ship to go to the aid of a ship in distress. Accordingly, there must be reliable radio-communications for alerting purposes to describe its plight and what assistance it requires and for coordinating assistance for the ship in distress. There must be sufficient competent manpower on board each ship to handle the ship's own lifeboats in a safe and efficient manner to participate in other life-saving procedures.

Article 9: Conclusion

1. Minimum manning requirements does not mean the minimum number in the sense of the fewest tolerable but means the minimum number that will be adequate for the safety of the ships, crews and passengers, property and the environment at all times.
2. Every vessel shall be sufficiently manned for the purpose of preventing excessive strain upon the crew and avoiding or minimizing as far as practicable the working of overtime.
3. It is the firm view of the ITF that all the above matters must be fully considered as a prerequisite to considering manning requirements on a numerical basis and guidelines formulated in accordance therewith.

Annex 4: Non-Seafarers Work (Article 8) – Implementation

The parties fully subscribe to the intent and the principles of Article 8 of this CBA. However, they also acknowledge that, depending on the location of the port and the type of the vessel, a full implementation of the provisions contained, specifically, in the text of Articles 8.1 and 8.2 may imply prior contact between the Company and various third parties, such as Charterers.

Therefore, where such communication between the Company and respective third parties is necessary, the parties agree that the full implementation of the provisions of Articles 8.1 and 8.2 shall be deferred for a transitional period to be identified in each specific case between the parties of the CBA.

Such deferment shall not be longer than 1st January 2020 for container vessels operating in the following areas: Baltic Sea, Canada, North Europe and West Europe excluding Mediterranean Sea (European sub-regions as defined by the European Union).

During any deferment of Articles 8.1 and 8.2 as identified above the following provisions shall apply:

- 8.1 Neither ship's crews nor anyone else on board whether in permanent or temporary employment by the Company shall carry out cargo handling and other work traditionally or historically done by dock workers without the prior agreement of the ITF Dockers Union or ITF Unions concerned and provided that the individual seafarers volunteer to carry out such duties, for which they should be adequately compensated. For the purpose of this clause "cargo handling" may include but is not limited to: loading, unloading, stowing, unstowing, pouring, trimming, classifying, sizing, stacking, unstacking as well as composing and decomposing unit loads; and also, services in relation with cargo or goods, such as tallying, weighing, measuring, cubing, checking, receiving, guarding, delivering, sampling and sealing, lashing and unlashings.
- 8.2 Where a vessel is in a port where an official trade dispute involving an ITF-affiliated dock workers' union is taking place, neither ship's crew nor anyone else on board whether in permanent or temporary employment by the Company shall undertake cargo handling and other work, traditionally and historically done by members of that union which would affect the resolution of such a dispute. The Company will not take any punitive measures against any seafarer who respects such dock workers' trade dispute and any such lawful act by the Seafarer shall not be treated as any breach of the Seafarer's contract of employment, provided that this act is lawful within the country it is taken.

The provisions of Article 8.3 shall apply with immediate effect as written in this CBA.
